PROJECTS

- JobEra

February 2023 - Present

 - **Tech Used : Go, React.js,Typescript, Tailwind, Redux, Postgresql, Render, Vercel, Docker, Stripe**
 - It is a application that integrates the Hiring Platform, users can hire/recruit Geeks and the Geeks can apply to Job-application and There is also a functionality of Premium user that leverage some extra benefits
 - Code: <https://github.com/felixoder/JobEra>
 - Live Link: <https://jobera-go.vercel.app/>
- E-Shop | Freelance

November 2023 - Present

 - **Tech Used: Go, React, Typescript, Tailwind, Redux, MongoDB, Firebase, Stripe**
 - It is a simple E com application that gives the user to shop products and the admin can post, accept the orders.
 - Code: <https://github.com/felixoder/Go-Shop>
 - Live Link: <https://go-shop-mk17.vercel.app/>
- StackOverflow Clone

November 2023 - Present

 - **Tech Used: Express, Node, React, Javascript, Tailwind, Redux, MongoDB, Firebase,**
 - It has been created to make a platform to give the user the functionality like Stack Overflow, users can ask questions, Reply , Give answer, apply for jobs and many more.
 - Code: https://github.com/felixoder/discussion_group
 - Live Link: <https://felixunderflow.onrender.com/>
- University TechHub | Freelance

November 2023 - Present

 - **Tech Used: Express, Node, React, Javascript, Tailwind, Redux, MongoDB, Firebase,**
 - This is created to give the student to log in Via university mail id and they can view the live hackathons, events, and many more and the admin can post that and there is also section to view the toppers of the university and there is a section of **Live Chat** and many more
 - Code: <https://github.com/felixoder/bwu-techhub>
 - Live Link: <https://bwu-cse-techhub.onrender.com/>
- FullStack Portfolio

November 2023 - Present

 - **Tech Used: Express, Node, React, Javascript, Tailwind, Redux, MongoDB, Firebase,**
 - There are so many portfolios but the main problem is they don't set the content dynamically, so this project is created to make the user have an app that adds the contents like skills, projects etc dynamically.
